WEEKLY LETTER FROM THE CAPITAL

Once again the capital has been roused to vivid realization of the curse of a big city—crime—when a near tragedy of front rank shocked the citizens on Friday. What appears from all indications to be an attempt to poison came to light when two men working at a well known bakery establishment here received a package of chocolates and after eating one or two were taken seriously ill and removed to the hospital.

The official analysis of the remains of the coated, poison candies gave them a strong content of strychnine. It is thought that each of the candies contained enough poison to kill two men.

Who mailed the deadly package to Cecil Larmer? The box contained a short missive, evidently not vicious of the men would not have taken the chocolate. This may be the clue that will eventually lead to a solution of the mystery and the attempted murder. Larmer handed the box to his fellow employee who took one of the chocolates and almost lost his life.

Police officials in the capital think the gift came from someone jealous of Larmer and an expert in handwriting is now at work on the short note it contained and the wrapper of the box.

The contents of the letter which accompanied the poison candies said something to the effect that had been made for a church bazaar and asking him to take them. The full contents are withheld for the present by the police.

The public has been holding its breath as it were during the long pause between the reception of news of the McAlpine adventures in the northern wilds and the last word received from them. Arctic storms and wintry weather have cut off radio communication with the party, isolated somewhere in the sub-Arctic, and in the meantime their story is delayed. It is certain they are safe however.

First shots in the civic election were fired Saturday evening when the Civic Government association candidates addressed the electors over the radio station CJCA. But three weeks remain before the election and aspirants for mayoral and aldermanic, as well as school board honors are preparing in earnest for a short but strenuous fight. The civic political pot is bubbling and almost boiling. Things promise to be fast and furious. Interest and expectation increases. Your correspondent wishes to say that some big surprises are brewing, if all rumors of the result are to be believed.

Fire, red and ruthless, illuminated the sky Friday morning about 6:30 o'clock. The McDougall commercial high school was gutted by a mysterious blaze which did damage amounting to \$225,000. There is confusion as to how the fire started at that time of the day, so long after it had been occupied. Stories of mysterious lights seen playing on the doors of the building during the night by watchmen, and of hoboes seen lurking about near the scene of the big conflagration are being told. The fire chief of the city has expressed his opinion that a cigarette butt left smouldering at night during a basketball game was the likeliest cause, but this is discounted by those who knew the circumstances of the alleged basketball game, which was played by girls it is stated.

Much interest was taken in the final rugby game between the Calgary Tigers and the Regina Rough Riders and undisputed regret is felt in the capital that an Alberta team did not carry off the honors. Saskatchewan for the nonce is the undisputed cock of the walk.

In political circles the outstanding news of the week has been the resignation of A. A. McGillivray, K. C., as Conservative provincial leader. The resignation has been expected by those on the inside for some time, as it was well known that Mr. McGillivray has felt he should give more time to his legal business. He will not resign his seat in the house, however, but will still remain the senior member for Calgary. Other Conservative members of the legislature are Col. C. Y. Weaver, D. M. Duggan of Edmonton, and John Irvine of Calgary. It is not known who will suc-

TO TRAIN FOR BOUT NOVEMBER 28TH

(From The Viking News)

Interest in the boxing program being sponsored by the local Elks for Thursday, November 28, was heightened on Tuesday by the arrival of Art Bryan Prudholme, one of the boxers in the main event, who is hooking up with Curly Kid Archibald, of Irma in a return match. Prudholme got a knockout decision over the Curly Kid at Wainwright on April 3rd, in the seventh round of a scheduled ten round go. Curly, it is said, has improved wonderfully since that time, and is anxious for a return match with Prudholme. His chances came when the Viking Elks secured consent of Prudholme to come here.

Prudholme has had several bouts since last spring, and appears to be in fine physical trim. He began working out this morning by doing some road work, and will do some boxing with local fistie hobs.

For the semi-windup the committee has been fortunate in securing Nash, of Irma, to exchange punches with Tovey, of Wainwright. These boys are as active as two wildcats and pack a wallop in each waist go for a haymaker—if they can connect.

Seats will be on sale at the Drug store this week.

Looks like its going to be a full house, boys, grab your seats now, and sit in on what promises to be the best show yet.

ced Mr. McGillivray.

Hon. R. B. Bennett, federal Conservative leader was in the Capital Thursday and was in consultation with other leaders of the party as to the leadership in Alberta. The conference was held at an informal luncheon in the Macdonald and behind closed doors. The press was for bidden and any statement following of the decision reached was withheld from the public for the time being.

One of the most sensational political episodes in Alberta was terminated Tuesday afternoon, when six persons arraigned in the supreme criminal court of the province pleaded guilty to charges in connection with irregularities in the Athabasca federal election of 1925. They were all released under suspended sentence by Mr. Justice Ford. "Fins" was thus written to this case.

The provincial government has under consideration the question of the settlement in Alberta of a large number of Mennonites who are desirous of emigrating to Canada from Russia. Premier Brownlee is favorable to them. He thinks Russian families of the Mennonite faith make thrifty reliable and useful settlers. In a statement to the press this week the premier said:

"Our decision in the matter will probably depend on where these people are to be placed and also on whether they are asking for any particular concessions in regard to the school laws. It is for the dominion authorities to deal with the defense question if that is involved in the case."

Bishop Toews, a leader of the Russian sect is in the city to consult with the government on the matter.

The Liberal nomination for the constituency of Athabasca riding was given to J. F. Buckley, barrister of St. Paul and the choice gives general satisfaction among Liberals in Edmonton. It is considered that Mr. Buckley is a fine type of citizen and will make a valuable addition if elected to the personnel in the legislature. Considerable importance is attached to the meeting of the redistribution committee of the legislature, which is called to meet on Tuesday this week. The chairman is W. G. Farquharson, M.L.A., for Ribstone. Some preparatory work on the redistribution puzzle has been going on some time and a report is to be submitted to the next session of the legislature.

Edmonton is quite air-minded these days. The plans for a new hangar for aeroplanes are completed and all the space in the new building is already rented by air companies and owners of 'planes. The structure is being rushed to completion and will be ready for the use of the aeroplanes in the new mail service to the north, as well as other machines travelling the air routes in northern Alberta.

M.D. BATTLE RIVER COUNCIL MINUTES

The Council of the Municipal District of Battle River No. 423 met in the Municipal Office at Irma, Alberta, with all members present.

The minutes of October 8th were read and on motion of Mr. Santee were approved as read.

Moved by Mr. Smallwood that the report of Committee investigating damage claim of Mr. Santee's crop be accepted.

For the motion Messrs. Smallwood, Santee and Burrell, against the motion Mr. Fischer. Motion carried. Moved by Mr. Burton that owing to the objection raised regarding the leasing of the road allowance between Sections 11 and 12-45-8-W4th at the point of diversion that this council cannot consent to the lease and for the Secretary to notify parties concerned. Cd.

Moved by Mr. Santee that this council grant Mr. Reese an Extension of one year on his agreement in the purchasing of the part of N.E. 20-45-9-W4th. Cd.

Moved by Mr. Burrell that this council receive the sum of \$100.00 from Mr. Russell and extend his agreement in the purchasing of the S.E. 4-15-9-W4th to Dec. 1st, 1930. Carried.

Moved by Mr. Burrell that this Municipality transfer road allowance for the diversion through Sec. 18-44-8-W4 to per plan No. 7930. Cd.

Moved by Mr. Vesey that the Secretary write the Department of Neglected Children that the father of Clara Shewby is able and willing to care for his child at home and that this Municipality will not be responsible for the maintenance of this child. Cd.

Moved by Mr. Smallwood that the Secretary write the Old Age Pension Dept. regarding Donald McDougall that when this applicant first made application for Old Age pension he was two months as a resident in this Municipality therefore four months short of the required time. Cd.

Moved by Mr. Santee that the Secretary advise Mr. Beaupre re the W. half of 27-45-7-W4th that owing to the lateness of this Wild Land appeal on the above land that he take this matter up with the Department of Municipal Affairs at Edmonton for Cancellation of this Wild Land Tax. Carried.

Moved by Mr. Vesey that the Council will not consent to the removal of any buildings on the S. W. 20-44-9-W4th with unless the purchaser pay the full amount owing to this Municipality on this parcel of land. Cd.

Moved by Mr. Santee that this council accept the bond prepared by the Canadian Indemnity Co., in favor of R. J. Tate, Secretary-Treasurer for the amount of \$5,000. Cd.

Moved by Mr. Burton that Messrs. Smallwood and Fischer present the Business Tax By-law to C. G. Purvis, Barrister for Examination. Cd.

Moved by Mr. Fischer that the following bills and Time sheets be passed and paid.

Chapman-Slessor Agencies Ltd.—\$20.00
Bond \$20.00

Moved by Mr. Burrell that report from Messrs. Smallwood and Burton regarding Wild Land Assessment claim and damage claim between Messrs. Hern and Szoke be accepted. Carried.

Moved by Mr. Burton that Dr. C. Greenberg be appointed Health Officer for this Municipality. Cd.

Moved by Mr. Santee that the Anniversary Meeting for Divisions 1 and 6 be held at Fabay on the Second Saturday in February, viz. Feb. 8th, 1930. Carried.

Moved by Mr. Burton that the an-

CHURCH NOTICES AND ACTIVITIES

UNITED CHURCH NOTES

On Sunday, November 24th the Anniversary Services will be held as follows:

Irma - 11 A.M. (Sunday School at 10:30 A.M.)
Alma Mater - 3 P.M.
Irma - 7:30 P.M.

The Rev. Harry Peters of Hardisty will be the special preacher. There will be no service at Strawberry Plains next Sunday morning. The people there are asked to come to the services in town. The choir has prepared special music for the occasion.

On Monday, November 25th the Anniversary Supper will be held commencing at 5:30 p.m. We want this to be a great event. All friends of the Church are urged to take part in this and to stay for the public meeting to follow. We have the unusual privilege of having a visit from Rev. Charles Endicott, D.D. The church should be crowded to capacity to hear him. Everyone is cordially invited.

ANGELICAN CHURCH SERVICES

Anglican Church service will be held in United Church, Irma at 3 P.M. on Sunday, November 24th. There will be a celebration of Holy Communion at that service. Everyone welcome.

The next W. A. meeting will be held at the home of Mrs. W. Cole on Tuesday, November 26th at 2:30 P.M. Every lady in the community welcome.

WOMEN'S INSTITUTE BAZAAR

SATURDAY, NOVEMBER 30th
The Irma Women's Institute will hold their Bazaar November 30th. Doors open at 2:30 p.m. Any donations will be gladly received.

WOMEN'S INSTITUTE

Monday night or early Tuesday morning burglars entered the general store of J. C. McFarland and Co. at Irma by cutting a hole through the panel of the rear door. Between two and three hundred dollars worth of merchandise was taken. A full description of the missing goods has been supplied to the Alberta Provincial police who have been very fortunate in clearing up several similar burglaries throughout the province.

Beaumont well No. 2 located ten miles east of Irma set the first string of casing last Friday to over 650 feet. Drilling will be resumed early next week when they expect to continue the hole down to the limestone when a deep test will be made.

Annual meeting of the Municipality be held in the Municipal Office, Irma on the third Saturday in February, viz. Feb. 15th, 1930. Cd.

Moved by Mr. Burton that the Secretary make out duplicate check in favor of I. Salverson for the amount of \$21.40 to replace original which was lost in the mail. Cd.

Moved by Mr. Smallwood that the Alberta National Railways, Edmonton, to the effect that Noxious Weeds are causing annoyance to the ratepayers in the vicinity of Battle River Bridge on the main line running through Sec. 14-45-8-W4th and request that these weeds be cut and burned without delay. Cd.

Moved by Mr. Burton that the Secretary notify all debtors to this Municipality by Registered mail that unless they make arrangements with the council in the view of settlement this Municipality will start foreclosure proceedings after December 1st, 1929. Cd.

Moved by Mr. Santee that the court of Revision under the Alberta Assessment Act will sit in the Municipal office at Irma, Alberta on December 10th, at 2 o'clock P.M. Cd. By-Law No. 28 presented.

Moved by Mr. Burton that By-Law No. 28 pass its first reading. Cd.

Moved by Mr. Fischer that By-Law No. 28 pass its second reading. Cd.

Moved by Mr. Vesey that By-Law No. 28 pass its third and final reading. Cd.

Moved by Mr. Burrell that this Council adjourn to meet at 10 o'clock A. M. sharp at the next regular meeting. Cd.

NEWS ITEMS FROM KINSELLA

A host of friends numbering about a hundred gathered at the home of Mr. Herman Overbo on Thursday evening last, and gave him a surprise. The occasion being a house warming. Expert musicians were on hand and dancing was indulged in until the wee small hours of the morning. Mr. S. F. Cullum on behalf of the audience made a few appropriate remarks and presented Mr. Overbo with two beautiful glass sets. Mr. Overbo responded very feelingly thanking the audience for the thoughtfulness and kindness shown. A sumptuous supper was served and dancing continued until three o'clock, when all dispersed voting the occasion one of the best held in the district for some time.

The annual meeting of the Kinsella Women's Institute will be held in Lee's hall on Saturday, November 30th. Anyone wishing to send parcels to the Sunshine Society are asked to bring them in to this meeting.

The Kinsella Community Skating rink is now completed with the exception of flooding, which will be done just as soon as the weather gets cold enough to freeze. For this purpose a well has been put down alongside the rink. The well is 80 feet deep and contains fifteen feet of water, and is of the two foot size. Boring was done by Mr. L. O'ary. At a recent meeting the following were elected as trustees: Messrs. J. F. Murray, F. Hajek, and V. A. Justik. The rink is 125 by 150 feet and is a real credit to the community.

A big dance will be held in Lee's Hall, in aid of the rink on Friday evening, November 22nd. Really good music has been secured for the occasion and a large attendance is hoped for.

Bertold, the eldest son of Mr. and Mrs. Figure, who for the past few days has been critically ill with pneumonia, was reported slightly improved on Sunday afternoon last. His many friends wish him an early recovery to good health.

Third and Ansel have had a basement put down under the warehouse at the rear of the store for the purpose of storing ice. The basement is concrete lined.

A host of friends gathered at the home of Mr. and Mrs. A. Overbo on Sunday afternoon, November 17. The occasion being a farewell surprise for Mr. Olaf Overbo. On behalf of the gathering Mr. Johann Overbo in a few well chosen words presented Mr. Overbo with a beautiful fountain pen and pencil combined. After presentation Mr. Overbo rose and being deeply touched, asked Mr. Johann Overbo to read as his farewell words to his friends: Phil. 4th Chap. 4-7 verses.

Mr. Overbo accompanied by his son Knut, motored to Wainwright on Tuesday to join the Confederation on the first lap of his journey to Norway.

M. D. Battle River Notices

**MUNICIPAL DISTRICT OF
BATTLE RIVER No. 423.**

Notice is hereby given that the assessment roll of the said Municipal District made for the purpose of the Alberta Assessment Commission has been prepared and will for forty days be open to inspection at the office of the Secretary Treasurer of the Municipal District from 10 o'clock in the forenoon until four o'clock in the afternoon on every day not a public holiday except Saturday and on that day from 10 o'clock in the forenoon until two o'clock in the afternoon and that any person who desires to object to the entry of his name or that of any other person upon said roll or to the assessment of any property or to the assessed value placed upon any property, must within forty days after the date of this notice lodge his complaint in writing with the Secretary Treasurer of the Municipal District.

Dated this 29th day of October, 1929.
R. J. TATE, Sec-Treas.

The Problem of Narcotics

The evil of narcotics is one that strikes both directly and indirectly at the home.

There are about 8,000 drug addicts, or dope fiends, as they are more commonly called, in Canada. They consume, and here is an even more startling figure, about \$80,000 worth of drugs every day.

The danger from the widespread use of narcotics in Canada, is that drug addicts breed drug addicts; each one is an agency of evil who will try to pull other victims into the mire in which he finds himself.

The four main drugs that have assailed Canada are opium, morphine, cocaine and heroin. Opium is the juice of the white poppy, cultivated mainly in Hindustan and Asiatic Turkey, and thickened by evaporation.

Opium would not be so important to us, but for the fact that other drugs that are used most extensively in Canada, come from opium.

About one hundred and twenty-five years ago, a French chemist found that he could produce another drug, morphine, which was named after the god of sleep, Morpheus, from opium.

Sixty-five years later another chemist, this one an Austrian, found by experimenting with coca leaves that he could produce cocaine.

Just thirty years ago, a German chemist found he could take from opium still another drug, which was called heroin. It is three or four times stronger than morphine, and is blamed largely for the increase in drug usage on this continent since the war. At first heroin was not believed to be habit-forming, and was used on that assumption. But two years after its discovery, it was found to be as bad, if not worse, in getting a grip on its victim. It has been renounced by the medical profession as not at all necessary for their purpose. But it continues in use throughout the world, a dangerous drug, without any redeeming feature or excuse for its existence.

All these three drugs, morphine, cocaine and heroin, are white powders, bitter to the taste and soluble in water. All are deleterious, both mentally and physically. The habitual use of any of them will bring death with inexorable certainty. Opium is the slowest to kill, morphine, the next, while heroin is the most rapid of all.

For example, to compare the drug habit with the liquor habit; five ounces of alcohol is considered a fatal dose. Five ounces of morphine taken at one time will kill fifteen hundred men.

Chemistry has given us these drugs, and passed them on to the medical profession. The doctors used them, with the exception of heroin, to assuage pain. But mankind was not satisfied with that, and the use of these drugs spread to people who did not need them. Now the combined wisdom of chemistry, medicine, and governments, is not sufficient to strike down the peril.

There are fantastic stories at times of people who have become drug addicts because they were given one of these drugs in a time of need, and that one administration made them addicts. Those are very rare cases, and hardly need to be taken into consideration. The use of drugs is spread about almost entirely by people who profit greatly by creating other addicts.

Thousands of tons of poisonous drugs are consumed every year by the human race. Less than one per cent. of the total consumption is necessary for medicinal purposes.

Before heroin came into such general use, adults were in the main, the only addicts. The dealers in heroin, however, rarely are very rare cases, and hardly need to be taken into consideration. The average age of the heroin addict is about 22 years of age, which means that he must have become addicted some years before he was twenty.

Again to compare the drug habit with the liquor habit: It takes some time of regular drinking before a youth becomes a regular drunkard. Not so with heroin. An ounce of heroin can make two thousand addicts within a week. As well as that, a drunkard sometimes serves as a useful example with which to point the warning finger. In fact a drunkard as a general rule, will advise others to keep away from the stimulant that caused his downfall. Not so the heroin addict. He begins right away to drag others into the net. He is used as a recruiting agent for the operators who are making the money. The more heroin he gets, the more he craves. He is told that in order to get more of it, he must introduce more customers. And so the peril spreads.

Airing a Grievance

Getting Irritation Out of Your System Makes You Feel Better

There is wisdom in letting people talk out their grievances. There is no other way to get rid of them. That is the reason why democracy thrives through free speech. If people have a grievance, let them talk it out. If they have a grievance, let them express it. Repression makes inner ugliness to become a poison. If you are wise, you will never seek to keep a man from expressing his irritations at his fellow men. Moreover, if you are really wise, you will understand how to deal with people who have a grievance. Let them get it out and they will have an opportunity to deal with their hearts after their emotions have had opportunity to express themselves.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach never has been overstimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Fighting Forest Fires At Night

Miner's Carbide Lamp Used By Rangers In Work Of Extinguishing Fires

Equipment is now in use by the Forest Service, Department of the Interior, which enables rangers to fight forest fires at night, when such work is most valuable, owing to the fires dying down at dark. The chief piece of special equipment is the miner's carbide lamp, which is attached to the fire-fighter's cap and so is located just above his forehead. This leaves his hands free to work, and gives the light just where desired, both for travel in reaching the fire and for the work of extinguishing the fire.

WOMEN WHO SUFFER

Anaemia Responsible For Most Of The Ills Of Girls and Women

Medical science shows that most of the ills that afflict growing girls and women are due to the fact that the blood is either poor in quality or deficient in quantity. This anaemia is the cause of loss of spirits, languidness, the poor appetite, breast tenderness, and the aching backs that make life a burden for so many women. There is no need for any woman to suffer in this way, for all the miseries of anaemia can be quickly banished by taking Dr. Williams' Pink Pills. It is an established fact that these pills create an abundance of new rich blood—their wonderful reputation is based on this.

Thousands of formerly weak and ailing women have cheerfully testified to the fact that they owe their restoration to good health to Dr. Williams' Pink Pills. One of these is Mrs. Napoleon Gallant, Tighish, P.E.I., who says: "I am among those who can strongly recommend Dr. Williams' Pink Pills. Before I began using them I was in an extremely nervous condition. I could not sleep, neither could I eat, and was constantly growing weaker. I got medicine from a doctor, but it did not seem to meet my condition, and then on the recommendation of a friend I began to take Dr. Williams' Pink Pills. By the time I had taken a couple of boxes there was no doubt they were helping me. I continued their use until I had taken six or seven boxes when I was again in the best of health. I always keep Dr. Williams' Pink Pills in the house, and if any member of the family feels run down the pills soon put them in good condition."

The best time to begin taking Dr. Williams' Pink Pills is the moment you feel least well. It is the sooner you do so the sooner you will regain your old-time energy. You can get the pills wherever Dr. Williams' Pink Pills are sold, or by mail, postpaid, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Power Of Sound Waves

If Highly Pitched They Will Do Much Damage

Living creatures can be struck dead by sound waves too highly pitched for the human ear to hear them, writes T. C. Bridges. These high frequency waves, called super-sonics, have been tried on animals and produced instant death. The sound appears to shatter the blood corpuscles, and death is as sure and sudden as if the creatures had been struck by lightning. Sound can do many things which seem mysterious and almost miraculous. For instance, fire can be extinguished by sound. Some little time ago Mr. Charles Kellogg, of California, gave a demonstration of the power of sound over flame, and by drawing a violin bow across a piece of aluminium extinguished a burning gas jet at fifty feet. Sound vibrations can not only break a window glass but can damage a building. It is suspected that the deep vibrating notes of organs can cause vibrations which may actually weaken the structure of a church or cathedral. The very latest wonder of sound is to make an aeroplane light up the aeroplane at which it is arriving merely by a note of its siren. This was done recently at Newark, New Jersey.

Preserving Old Windmills

Germany is preserving its old windmills because of their historic value and their picturesque touch to the scenery. To raise funds for their preservation many of the windmills have been fitted up as rest houses, where young people on walking tours can get a night's lodging at a low rate.

Exporting Electricity

Electricity is exported from Canada only by license granted by the Electricity and Gas Inspection Service of the Department of Trade and Commerce, and the same branch of the department has jurisdiction over the export duty which has been imposed since April 1, 1925.

The favorite pet of the poet Burns was a sheep, while Rosetti leaned toward woodchucks, wombats, armadillos, kangaroos and chameleons.

Feel Sore? Use Minard's Liniment.

Canada's Economic Conditions

Confidence Is Felt By Big Financial Men In The Future Of The Dominion

In the face of the serious decline in prices of stocks, Premier Mackenzie King recently made a brief statement to newspapermen in which he desired that economic conditions in Canada had never been sounder, nor faith in the development of the Dominion greater, if one was to judge by those indices used by the large financial and insurance companies. The hectic conditions which had prevailed recently might have an adverse effect on Canadian stocks, but Mr. King said that the confidence shown by foreign investors should in itself be a factor in inspiring confidence in the Dominion and its future.

It was at times like these, said Mr. King, that one realized the importance of stability in laws and general soundness of business in a country. Canada's position was secure, he thought, and he pointed to the growth all along the line of primary and secondary industries in the country. The fact that capital for investment was so freely offered in Canada showed the confidence that was felt in the future of the Dominion.

To Honor Pioneer

Pioneer 100 Years Ago Dr. William Fraser Talmie, Physician of the Hudson's Bay Company, at Fort Vancouver, Washington, Trudged up the Puget Sound River to Mount Rainier, the first white man to reach a peak now known as a scenic resort.

Nearly 100 years ago Dr. William Fraser Talmie, physician of the Hudson's Bay Company, at Fort Vancouver, Washington, trudged up the Puget Sound River to Mount Rainier, the first white man to reach a peak now known as a scenic resort. In 1935, the centenary of this expedition, Dr. Talmie's son, premier of British Columbia, will be the guest of honor at a celebration of Mount Rainier's discovery.

The premier has accepted the invitation of the Rainier National Park advisory board to take the leading part in the ceremony a little over three years hence.

FAINT, DIZZY SPELLS

Had To Sleep Propped Up In Bed

Mrs. Norman Bishop, Salisbury, N.B., writes: "I was troubled with faint and dizzy spells and when I would lie down I would suffer terribly with smothering spells. I got so bad I had to sleep propped up in bed. My doctor said it was my heart and nerves, and that I needed a good heart tonic."

and I had not taken one box when I was able to sleep at night. Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Irate Passenger (as train is moving off): "Why the— didn't you put my luggage in as I told you, you old fool?" Porter: "Eh, man, yer baggage is na sic a rule as yersel'. Ye're in the wrong train."

Joint Branch Line

Programme Announced

Announcement has been made jointly by Sir Henry Thornton and E. W. Beatty, of the branch line programme to be commenced in 1930 by the Northern Alberta railways. The presidents of the two transcontinental systems, which jointly own the Alberta railways, point out that under the agreement for acquisition the purchasers undertook to build within five years sixty miles of branch lines, in addition to the branches under construction by the government of Alberta at the time the purchase was made.

To meet the traffic needs of the district, and in fulfillment of statements previously made, the directors of the Northern Alberta railways have, therefore, decided to recommend to the government and to the directors of the Canadian Pacific, the commencement in 1930 of a line from Hythe to Rolla, a distance of fifty miles, and from Fairview westerly, a distance of 15 miles. In addition, the Northern Alberta railways will, during the coming year, undertake to investigate the traffic possibilities of an extension west from Spirit River and from a point at or near Grimshaw, to serve the Battle River district in which considerable settlement has taken place.

The programme announced is of considerable magnitude and confirms the statement already issued that in the opinion of the Canadian National and Canadian Pacific companies, the most important and immediate work in the development of the Peace River area is the construction of branch line mileage.

A Remarkable Tree

White Pine Tree In Ontario Weighs 17 Cords Of Wood

Remarkable in size, symmetry and the soundness of its wood, a white pine tree which has been lying 40 or 50 years or more on the farm of Norman Reid on Colongue Lake, in the North Bay (Ont.) district, was utilized recently for wood.

It yielded 17 cords. The pine measured 145 feet from the tip to the base, which showed a diameter of five feet, 10 inches. Twenty feet higher up the diameter was but six inches less. The first branch was three feet through and the second two feet six inches. The stump bears evidence that the tree was felled either completely or partially, possibly half a century ago, remaining in a wonderful state of preservation through the changing seasons.

Meeting Of Two Seas

Uniting Of Mediterranean and Red Sea Foretold By Jules Verne

August last witnessed the diamond jubilee of the opening of the Suez Canal. In 1869 the waters of the Mediterranean and the Red Sea met and mingled for the first time, although the canal was not opened for traffic until November. It is interesting to remember that Jules Verne imagined an underground tunnel uniting the two seas, running under the isthmus, and that he makes Captain Nemo take his under-sea craft—the prototype of the submarine—right through it.

Didn't Interest Him

An actor, who, because of his wandering profession had seldom paid his income tax, was at last discovered by the authorities, who promptly sent him a return to complete.

The actor kept it for a few days and sent it back with a little note: "Thank you very much, but I don't wish to join this affair."

Experiments show that an expert violinist can make 600 separate movements with his fingers during a single day's playing.

Your Kids Need Sugar

Canadian Fliers Organize

First Convention Of Its Kind Held At Fort William

With nearly 20 delegates from coast to coast in attendance, the first all-Canada aviation convention was held recently at Fort William. J. A. Sully, president of the Winnipeg Flying Club, was chosen chairman of the initial meeting.

The first business of the convention was the organization of a central body of the flying clubs throughout the Dominion, to be known officially as the "Canadian Flying Club Association." This association will be official spokesmen of the various clubs throughout the Dominion, and will attempt to solve many of the problems which today face aviators from the Atlantic to the Pacific.

Delegates from the several clubs will be known as the board of governors and this body annually will choose a president, five vice-presidents, one honorary secretary and an honorary treasurer. The vice-presidents will be regional officers, from the following districts:

British Columbia, Alberta and Saskatchewan, Manitoba and Thunder Bay district, Ontario east of Thunder Bay and Quebec and the Maritimes.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother's Own Worm Expeller.

Reason Prince Sold Hunters

When the Prince of Wales abandoned fox hunting and sold his horses this year, he did so not for his own personal safety, as was generally believed, but because the prohibition of fox hunting was about to come before Parliament and the heir to the throne must not become involved in any political issue.

It is an old custom in Derbyshire, England, to decorate beehives just before a wedding.

It is estimated that 15,000 public speeches are made every day of the week throughout the year.

A man's credit is getting pretty low when he can't even borrow trouble.

WATER ICE WAFERS

League of Nations Society Accomplishing Good Work, But Handicapped By Lack of Funds

With the visit of Rt. Hon. Ramsay MacDonald to the United States and Canada, and the momentous decisions which will result from that visit public attention has been concentrated on the subject of world peace.

In considering this subject much credit is given to the League of Nations, in Geneva, and the great work it is doing. This is only right and the more the ideals of the League are brought before the public, the more likely is it that still further practical results will follow its efforts. But in Canada and elsewhere it is only fair that some credit should come to the home societies which are actively propagating League ideals in their several countries.

In Canada there has existed for some nine years an organization well and favorably known as the League of Nations Society of Canada. Handicapped by lack of funds, by comparative public indifference and an inadequate staff, it has continuously attempted to be an influence for good in all parts of the country and to zealously battle for the ideals for which it was founded.

Through the co-operation of the press of Canada, whose leading executives recognize the importance of its campaign, some publicity has been given to the yearly effort of this organization to increase its membership, but we feel that more continuous co-operation both by press and public would be most opportune at the present time.

Geneva is far away, and many of the issues with which it deals are too complicated for the average man to readily understand. No organization is more in need of domestic interpretation, and that work is being carried out with praiseworthy diligence. It is not too much to say that such an organization would be a fit subject for a perpetual endowment which would relieve it of the necessity of canvassing for the comparatively small sum which it requires to carry on its immensely valuable work.—The Frederick Daily Mail.

Canada's New Northwest

John M. Imrie Tells Easterners of Development in the West

Speaking at a joint dinner of the Canadian and Rotary clubs at Sherbrooke, Que., John M. Imrie, managing editor of the Edmonton Journal, described what he calls "Canada's New Northwest," and told of the active progress of that section of the Dominion, stretching northwest of Lake Superior, and basic causes of the new movement—the lure of mineral wealth as well as agricultural and forest development.

"It has to do with new discoveries of oil and gas," said Mr. Imrie, "with new trade routes and new foreign markets, and with economic changes that are making for decentralization of industry."

Had Tried It

One morning while the children were eating breakfast Milford put two heaping spoonfuls of sugar in his cocoa.

"I should think one spoonful would be enough," objected his sister. "I should think so, too," he replied, "but it ain't."

Anguished Diner: "Waiter, call the manager! There's a beetle in the soup!"

Waiter: "It's no use sending for him, sir; he's scared to death of them!"

Think twice before you speak and you'll have twice as much not to regret.

Dietician says hash contains vitamins. If any other foods contain vitamins, hash just naturally has to.

"Leon, before I marry you, I must confess that I have a glass eye."
"That is nothing. Only one more window to clean."—Moustique, Charleroi.

W. N. U. 1811

Imperial Farmers' Union

Federation To Encourage the Consumption of Empire Products

The National Farmers' Union of Scotland have prepared the formation of an Imperial Farmers' Union or Federation to encourage the consumption of Empire products, to eliminate competition between different parts of the Empire, to stabilize supplies and prices, to control surpluses and other similar objects.

"As this was in line with the policy of the United Farmers' of Canada, Saskatchewan section, the matter was taken up by the executive of the organization at Saskatoon and the following resolution passed: "That in the opinion of the executive such affiliation could be made if we had a national organization in Canada or a co-ordinating agency, and that until such an organization is formed we endeavor to establish contact by way of correspondence and literature with the National Farmers' Union of Scotland."

A letter received at the U.F.C. headquarters, the secretary of the Scottish union, expressed surprise that farmers had no national organization in Canada, and hoped that it would be possible to co-ordinate the work of the various provincial organizations through a central executive which to begin with, might act in an advisory capacity.

Commenting on the proposal, Frank Eliason, secretary of the U.F.C. said: "Everywhere throughout the Empire there seems to be a move towards closer relationships in agriculture for the control of surpluses and for the stabilization of prices and thus place agriculture on a sound business basis. The U.F.C. administration is anxious to develop this movement and will do all they can to bring about a co-ordination of the provincial organizations as they realize more than ever before that farm products must be controlled by the farmers themselves in order to stabilize prices on a basis that will make agriculture prosperous."

Western Horses Go East

Shipment Of 18 Animals Sent From Moose Jaw To New Brunswick

In order to try out the market for certain types of horses in New Brunswick, a shipment of 18 animals was consigned from Moose Jaw to the Maritime Province by the Saskatchewan Livestock Pool and the Department of Agriculture. Under the arrangements entered into between the Livestock Pool and the Federal and Provincial Governments, the Pool assembles the shipments and the two Governments assist in promoting the sale of the horses. Larger shipments are to be made in the near future.

No Introduction Needed

Canadians Are Welcomed At Any International Gathering

Canada is the most promising country in the world, in the estimation of the statesmen assembled for the League of Nations council, Hon. J. C. Elliott, Minister of Public Works, stated on his return to Ottawa from Europe. To have come from Canada is a first class introduction in any international gathering, he said. Mr. Elliott was one of the Canadian delegates at Geneva, this autumn.

His Explanation

Tommy had a new puppy, of which he was very proud, so he asked his little pal, Mary, who was a very thin child, to come and make its acquaintance.

"The puppy seemed to take quite a fancy to Mary, and followed her all over the place."
"Why, Tommy," she cried proudly, "I believe your puppy like me better than you!"

"I suppose you know why," retorted Tommy, slightly jealous. "It's because he thinks you're a bone!"

Egyptians Reverence Palm Tree

The date palm tree is a sacred thing. For thousands of years it has been to the Egyptian felahs and to the nomads of Africa the tree of life and the tree of death. Its dates are so nourishing that with frugal races they are a principal article of food. Upon its transparent bark was written, in ancient hieroglyphics, the first awakening of human thought. Its wood provided coffins for the old Egyptian tombs; its essences perfumed the wrappings of mummies.

The enamel of a tooth is practically the same composition as crystalline phosphate rock.

Jap Diplomats Land

"The destinies of Canada and Japan lie together in the great Pacific Ocean," declared Hon. Iyemasa Tokugawa, K.C.V.O., first minister to represent the Emperor of Japan in Canada, when he reached the Dominion on board Canadian Pacific liner "Empress of France," at Vancouver, recently. With him is photographed Togo Fukuoka, Japanese Consul-General. Mr. Tokugawa is the son of Prince Iyemasa Tokugawa, and a man of long experience in diplomacy. He was on his way to Ottawa to present his credentials to the Canadian Government from the Japanese Emperor.

Miracle Of Conducting

Dr. Erich Fisher, a Swiss engineer, has completed an invention whereby orchestras in different countries can be conducted simultaneously by wireless. An experiment will be made at Zurich shortly, when orchestras in London, Paris, Berlin, and Milan, under Dr. Fisher's command, will unite in transmitting a new hymn to commemorate the tenth assembly of the League of Nations.

Whales depend upon hearing more than any other sense to protect them from their enemies.

Evidence Of Ancient Custom

It was customary with girls in ancient Greece and Rome to offer, when they approached the marriageable age, their dolls to Venus or Diana. Many of these ancient dolls, made of wood, clay, ivory or wax, have been found in tombs of Greek and Roman origin. These curious votive offerings seem to have been universal in the ancient world.

If species adjust themselves to adversity, as the evolutionists say, why hasn't lawn grass learned to grow so high and then quit?

FASHION

No. 143—Modish—Slender. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 3/4 yard of 36-inch contrasting.

No. 910—Distinguished Model. This style is designed in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust measure. Size 36 requires 3 yards of 40-inch material with 1/2 yard of 36-inch contrasting.

No. 498—Morning or House Dress. This style is designed in sizes 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 1/2 yard of 36-inch contrasting.

No. 526—Grown-Up Style. This style is designed in sizes 6, 8, 10 and 12 years. Size 8 requires 2 yards of 40-inch material with 3/4 yard of 27 1/2-inch contrasting.

No. 965—Cunning Bloomer Dress. This style is designed in sizes 2, 4 and 6 years. Size 4 requires 2 1/2 yards of 36-inch material.

Projected Trans-Atlantic Air Service From Canada To England via Greenland

Seed Oats To Be Supplied

Farmers In Saskatchewan Dry Area Should Order Early

That arrangements were made some time ago for the purchasing of seed oats for farmers in the drought affected districts of Saskatchewan, is announced by Hon. W. C. Buckle, Minister of Agriculture, who stated that a considerable portion of the oats required for this purpose have already been bought and deliveries are being made to the Canadian Government Elevator, at Moose Jaw. R. M. Johnson, of Pasqua, acting as seed purchasing commissioner, has represented the government in these transactions, but is not purchasing fodder as has been reported in the press.

Investigation reveals the fact that while there is in Saskatchewan a sufficient quantity of oats to meet feed requirements, there does not appear to be sufficient seed oats, consequently purchases have been made in the province of Alberta in addition to those which have been and are being purchased in Saskatchewan.

The Department of Agriculture is receiving offers of seed oats grown in Saskatchewan and is making selections from those of quantities suitable for seed purposes. It is not expected that there will be any difficulty in getting a sufficient supply of seed oats if oats which are suitable for seed are used for that purpose instead of for fodder. It is also expected that prices to farmers in the affected areas will be within reasonable bounds for grades No. 1 and No. 2 seed. The department will be in a position shortly to all orders for carloads of seed oats purchased by rural municipalities.

The minister stated also that in his opinion it would be well for farmers to make arrangements at an early date to provide for their seed supply in order to avoid possible disappointment.

Grain Mixtures For Feed

Practice Of Sowing Mixture Of Grains For Feed Over Growing Oats Has Little Value

There is apparently little advantage in sowing mixture of grain for feed over growing oats alone when a good variety is chosen. This conclusion, at least, may be drawn from an experiment that has been going on for several years at the Fredericton, N.B. Experiment Station, and which is published in the report of the superintendent for last year, which may be secured from the publications branch, Department of Agriculture, Ottawa.

Three plots were sown with mixtures and three with single varieties. The grains used were Huron wheat, Victory oats and Charlottetown No. 80 barley. For the past four years the average yield has been highest with Victory oats which were sown at the rate of three bushels per acre. The yield was at the rate of 1,648 pounds to the acre, as against 1,643 for a mixture of wheat one peck, oats two bushels, and barley one bushel. The next lower yield was 1,600 pounds from a mixture of wheat two pecks, oats and barley one bushel each. When wheat, oats and barley were sown in equal amounts of one bushel each to the acre the yield was 1,506 pounds. The barley alone sown at two and one-half bushels to the acre gave a yield of 1,316 pounds, while Huron wheat sown at one bushel and three pecks, yielded 708 pounds as an average for the four years.

In another series of experiments barley and oats when sown in combination and at different rates were compared with oats and barley sown alone. The highest average yield for the four years was 1,794 pounds to the acre from a seeding of one bushel of barley and two bushels of oats. Victory oats alone gave the next yield of 1,648 pounds, it was followed by oats six pecks, and barley six pecks, sown together, of 1,584, while oats one bushel and barley one bushel, gave 1,471 pounds, and barley alone, 1,316 pounds to the acre. In the second series of experiments the highest yield was obtained from a mixture of two parts of oats, one part barley sown at the rate of three bushels to the acre.

Clerk—Do you want a room for 50 or 75 cents?

Stranger—What's the difference between them?

Clerk—In the 75-cent rooms we put a rat trap.

The fishing industry of Manitoba contributes more than \$2,000,000 annually to the production figures of that province.

Details of the projected trans-Atlantic air service from Canada to England via Greenland, are contained in information received by the Civil Aviation Branch of the Department of National Defence, at Ottawa.

The scheme, which calls for an elaborate outlay of airports and radio beacons from Winnipeg to Baker Lake, and from Baker Lake to Cape Dyer, in Canada, is advanced by Warren Scholl, a consulting engineer from Chicago, who is now staying in Winnipeg.

Mr. Scholl is seeking to promote the scheme, which calls for a daily service between Chicago and Croydon, using Winnipeg as the main stopping point on this continent. He plans to operate a shuttle service between New York and Winnipeg, as well as between the western city and other important population centres.

From Cape Dyer it is planned that planes should fly to Southern Greenland where an airport would be established on the level surface of the ice cap. From Greenland planes would fly to Iceland, to the Faroe Islands, and over Ireland to Croydon.

Mr. Scholl is seeking to organize three separate companies, one in the United States, one in Canada, and the third in Great Britain, which would bear the cost of the whole scheme between them.

His plan calls for the floating of separate loans in each country and for the exchange of blocks of stock between the three countries involved, so that profit and loss would be equally distributed.

Planes used in the service would be amphibians, of all-metal construction. Pilots would be guided over the entire route by radio beacons, which, Mr. Scholl thinks, would defeat the hazards of bad weather flying. Super-sensitive altimeters would enable pilots to make blind landings with an accuracy of four feet, considered by authorities to be a safe margin. The route would be lighted, although airports would be equipped with the most modern of lighting equipment.

Revenue would be derived through the carrying of passengers, mail and express. The machines would have a capacity of not more than 20 passengers, while a system of deferred express rates, something like cable rates, would be instituted to make up pay loads on days when the passenger quota was small.

Where the Rain Goes

Experiments Show Largest Amount Returns To Atmosphere Through Evaporation

Where does the rain go? A three-year study by the United States Geological Survey has answered this question. The Pomperaug Basin, in Connecticut, which is believed to be typical of the country at large, was given intensive study. The results, says Popular Science Monthly, showed that of the annual rainfall of 44 inches, 21 inches flow out through streams. The other 23 inches return to the atmosphere. Evaporation from the soil, from water surfaces, and from the leaves of trees account for these tons of moisture that enter the air.

Spilled the Show

The Dramatic Society was presenting an historical play, and one of the newly enrolled members had been assigned a part with exactly one line to speak. He was the headman, and arrayed in all the glory of black tights and mask, he strode on to the centre of the stage and announced: "My lord, my lord, I have beheaded the maid."

"Oh, you 'ave, 'ave you?" retorted another small-part man in the guise of the cruel king. "Well, allow me to tell you that you've messed up the 'ole blooming show. You've been and done it two acts too soon."

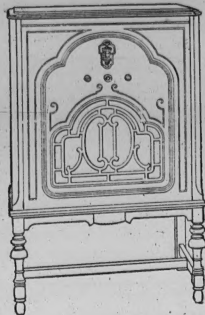

One thing we haven't seen yet is a paper guest towel.

"What luck! We are falling right in front of Dr. Smith's surgery."—Buen Humor, Madrid.

The New Triumph Marconi

Batteryless Console

The performance of this new Marconi model sets a new high standard in the field of Batteryless Radio.

Powered with nine of the latest "AC" Radiotrons, it operates direct from the house lighting current, furnishing the sensitive selectivity and tone brilliancy that will satisfy the most critical.

Built into its handsome two-tone matched walnut cabinet is a Superb Dynamic Speaker, assuring a smoothness and a fidelity of reproduction over the entire musical scale. Rattle or distortion is pleasingly absent from reception even when operated at room-filling volume.

Judged by any standard this new Triumph Marconi Batteryless is a Receiver the owner may well be proud of.

Household Hints

When taking food in dishes to a church supper or a bake sale, place a piece of adhesive plaster with your name on it on the bottom of each dish. This will insure safety and less trouble in looking up dishes.

Save bits of colored embroidery floss and work the centre front button of baby daughter bloomers to match the color of her dress, and she can easily put them on without asking which side is which.

Most silk hose are too long in the leg for short women. Here is a good remedy for this, and also to save hose from runs. Before wearing new ones stitch on the sewing machine two or three narrow tucks at top of hose, stretching the tuck as stitched. If a run starts, the tucks stop it.

When lemons are cheap, buy a quantity, slice them and pack in mason jars with alternate layers of granulated sugar. When full, cover the top with sugar and seal. They will keep indefinitely.

When folding sheets or blankets, stand on a chair to do it. It will be easier on the back and arms.

Try putting sand in vase or basket in which you are putting a winter bouquet. This makes the arranging of flowers easier, and the weight of the sand keeps them from being knocked or blown over easily.

When using eggs for baking, try picking holes in each end of the shells and blowing the contents out. Then save these shells and dip them in bright dye or cover them with gilt paint for Christmas tree decorations. The gilt ones look particularly pretty on the lighted tree.

The old maid has at least one thing to be thankful for. She doesn't have to worry where her husband is at night.

"I suppose you are now over your time of billing and cooing," said a local lady to a newly married man here. "Well, the cooing has ceased," he replied, "but I don't see any let up in the billing."

"I saw something last night that I shall never get over," said a Jarro fellow to his Irma girl. "Oh, dear, what was it?" she asked. "The moon," he replied.

VIKING

The Viking Library Board held a meeting Friday evening and decided to hold another Book Drive for the library from November 23rd to November 30th. During the past two years the public has given a generous response to the book drives and it is anticipated that this year will be no exception.

Anyone having books, new or old, they can spare and wish to donate to the library, should leave same at the library, Saturday afternoon and evening, November 23rd and November 30th, or if bringing same in during the week, the books may be left at the Collier garage.

So let's give the bookshelves the once over, pick out the books you have finished with, and bring them in to the library. By everybody doing this, not only the library will be benefited, but all the members will have the pleasure of reading many new books through the winter months.

Commencing November 23rd, the library will be kept open Saturday afternoons, 2 to 4:30 p.m. and 7 to 9 p.m. to accommodate the public.

Carl Carlson left for his home at Egersund, Norway, today where he expects to spend the winter. He has been employed by Sivert Hafso, for the past ten years, and has been a very steady man. He may decide to locate in Norway but chances are that he will return to this district with a bride and start on a farm for himself. What this western Canada needs is more of this type of men, regardless of nationality, who come to work and want work and eventually establish a home for themselves.

W. H. Wallace reports that he has liberated a number of ring-necked pheasants on his farm, and that hunters are asked not to shoot them. Mr. Wallace and Mr. B. C. Gilpin, have had considerable success in raising some of these birds that are expected to become one of Alberta's best game birds in a few years, and sportsmen are asked to be on the look out for them and protect them in every way possible until they become numerous enough to declare open season.

The thermometer dipped to six below zero Wednesday morning, the coldest yet this fall. The weather and temperature as a whole this fall has been the finest that has been experienced for many years, in fact old timers say they do not remember anything quite so mild for twenty five years. The slight snowfall also reminds us to look at the calendar and find that it is only 35 more days to Christmas. Tempus fugit.

Ken Hilliker, Harry Lawes and Fred Lawes left on Monday on a big game hunting expedition that will take them to the wilds north of Edmonton where the moose lie in waiting for the hunters who sally forth at daybreak or thereabouts in search for the king of the forests.

The Viking Movies are presenting this week the well known drama entitled Mother Machree. This film has played to full houses wherever shown, and is reputed to be one of the best of its kind now showing. At Viking Friday and Saturday evenings this week. See ad on front page.

An aeroplane passed over the Clover Lodge district on Saturday forenoon at ten o'clock, which is supposed to be one of the new big planes that will be used in the air mail service.

Jas. A. Craig and W. E. McDonald left Tuesday evening for Edmonton to attend rural municipal convention. Emil Miller is attending the annual convention of the Alberta hotelmen's association which is convening at the MacDonald hotel this week.

Miss M. E. Stoney left on Monday for her home in the Old Country where she will spend the winter months with relatives and friends.

Mrs. H. Rollins was in Tofield last week attending a reception to her cousin, Mrs. Bud Hannan, nee Miss E. Wood.

Mr. and Mrs. Bruce Hibbert of Edmonton were recent visitors at the home of Mr. and Mrs. G. P. Lee south of town.

The Royal Cafe is having a new front built on and other improvements made under the guiding hand of contractor Leeder.

Keep November 28th open for the big bout at Viking.

A. McGregor, of Jarrow district, was a visitor in town on Tuesday.

Mr. and Mrs. H. P. Stock motored to Vegreville on Sunday.

Mr. and Mrs. C. A. Dupre spent Sunday at Wainwright.

Mr. and Mrs. J. J. Leeder motored to Wainwright on Sunday.

Mrs. C. Gravett and Miss Gladys Harris are spending the week in Edmonton with relatives and friends.

R. J. Darrah has been a visitor in Vancouver with his family during the past two weeks.

Merle Kirby, of Rumsay, visited with friends and renewed acquaintances here last week.

VIKING

J. L. Horton has been up from Wainwright the past few days locating some horses belonging to him in the Torlea district.

W. A. Walker is attending the convention of the rural municipal hospitals association, and the convention of the rural municipal districts being held in Edmonton this week.

H. Rollins who is secretary of the rural municipal hospitals association, and R. T. Dorwood, president, are in Edmonton this week attending to the business of the annual convention of that body being held in the city.

L. O. Wollen has returned from Regina where he attended the annual meeting of the shareholders of the U. G. G. He reports a very interesting time. He will make a report to the local organization shortly.

Callier's garage is alleged to have been entered by some light fingered gentleman Sunday evening between the hours of 10 to 11:30 and helped himself to the contents of the till which amounted to about three dollars.

Little Keith Hoskins, son of Mr. and Mrs. Thos. Hoskins, was taken to Edmonton last Friday where he underwent a serious operation. It is reported that the little fellow is doing quite well.

Percy Main and Thos. Hoskins returned on Saturday from their sojourn in the north woods where they were hunting big game. They brought home a moose apiece. George Savage and Roland Brooke are remaining a few days longer, and have also got their moose" it is reported.

The Annual Christmas Entertainment of the United Sunday School will be held on December 23rd in the Elks Community Hall.

The two accordion players who furnished music for the successful dance a week ago Wednesday, will be back again on Tuesday, November 26th at the new Elks Community Hall.

Erskine manse was the scene of a quiet but pretty wedding on Friday, November 15th, when the Rev. J. A. Caldwell united in marriage Henrietta Wilson, only daughter of Mrs. M. A. McKill, Edmonton, and the late J. J. McKill, of Viking, to Frank, eldest son of Mrs. E. A. Linford and the late J. Linford, of Edmonton.

The old familiar garage building which has stood on the north side of the street opposite the King Edward hotel with the big letters painted on it, "The Viking Development Co." is no more. It was sawed in two, and one part moved to the rear of the Broughton barber shop, and the other to the C. Gravett property on west Fifth Avenue. It was one of the first garages built in town for the first cars that chugged on the streets of Viking.

All curlers and others interested in curling are asked to meet in the Town Hall on Monday evening, November 25th at 7:30 for the purpose of electing skips and rinks, and to transact any other business that may come before the meeting. A large attendance is requested so that the "warrior" game may start in full swing when the ice is ready.

"Red" Martin, the new caretaker, has made two attempts to make ice, but each time warm weather has stopped him. Now that the weather has braced up a bit, it is believed that it will be possible to make ice in a short time.

MOTHER MACHREE

There's a spot in my heart which no colleen may own,
There's a depth in my soul never sounded or known;
There's a place in my mem'ry, my life, that you fill,
No other can take, no one ever will.
Sure I love the dear silver that shines in your hair,
And the brow that's all furrowed and wrinkled with care.
I kiss the dear fingers, so toil-worn for me,
Oh, God bless you and keep you, Mother Machree!

Ev'ry sorrow or care in the dear days gone by,
Was made bright by the light of the smile in your eye;
Like a candle that's set in a window at night,
Your fond love has cheered me, and guided me right.

Temperance circles in the capital have been greatly shocked this week by a case that came before Magistrate F. C. H. Primrose in police court. A prisoner in the dock stated unblushingly that he could drink 30 to 40 glasses of beer without getting the least bit intoxicated! Many men have been heard to express a longing envy of the claimant to this unequalled feat! The man was charged with driving a car while intoxicated. His friends promptly came to his aid and testified that drinking from 25 to 30 glasses of beer to him was just like drinking water! "Would God the gift to give us" is a favorite saying of many who would follow in his steps. But the gift is elusive apparently.

NEWS ITEMS
FROM JARROW

The novelty dance held on Friday night by the community Club was a decided success. The weather was good. The music snappy, and there was lots of novelties, which altogether made a successful evening. About thirty dollars was cleared which goes toward the hall debt. The next entertainment of the club will be a card party the first of the week in December and then the play, "Apple Blossom Time" will be staged on December 13th. The young people in this play are working hard to make this a success and a dance is being arranged after it.

The regular meeting of the Club will be held on Tuesday of next week. The young people have charge of the program.

Mr. and Mrs. E. Williams and family visited in Wainwright on Sunday.

Quite a number of the young folks of Wainwright were in the wedding dance at Valley School on Tuesday night.

Mr. and Mrs. Jos. Miller and Miss Eileen Meakins motored to Edberg and Camrose on Wednesday returning Thursday.

Cecil Barrie, magician and entertainer will be at the Jarrow hall on November 27th with a good program.

With an Insulexed Home

HERE is depicted the feelings of hundreds of men who have discovered the boon of DRY INSULEX.

This light, fluffy, vermin-proof Gypsum product when placed in a two to three-inch layer between attic floor joists prevents heat waste. It forms a fire-proof barrier which keeps heat at work longer inside the house. Without muss or fuss and at very little cost you can insulate your home with DRY INSULEX.

See us to-day and arrange for added comfort this winter from your fuel savings.

WORLD HAPPENINGS BRIEFLY TOLD

Frau Schroeter-Voreisen, claims the record parachute drop for women from 2,500 metres (8,200 feet). She carried a sealed altitude indicator. Right Hon. Winston Churchill, former chancellor of the exchequer, has been elected lord rector of Edinburgh University.

Marquis Katsumonaka Inouye, former Japanese ambassador to London, died November 4, at Tokyo. He was 68 years old.

Dr. Frederick Montzambert, former director-general of public health and sanitary advisor to the Dominion government, died at his residence, in Ottawa, after a prolonged illness.

The London papers say that the Prince of Wales is planning to return to Africa to finish the tour which was so suddenly interrupted last year by the serious illness of King George.

Legal difficulties in the way of purchasing by the Prince of Wales, of a section of school lands in Alberta as part of the E.P. Ranch have been set aside as a result of an order-in-council officially published in the Canadian Gazette.

The title of the forthcoming book of Georges Clemenceau, former French premier, on which he has worked so hard during his recent illness, is, "Grandeur and Misery of a Victory."

To safeguard the child from damage that worms cause, use Miller's Worm Powders, the medicine par excellence for children. These powders will clear the system entirely of worms, will regulate and stimulate the organs injuriously affected by the worms, and will encourage healthful operation of the digestive processes. As a vermifuge it can be relied on for its effectiveness.

A New Ailment

People Seem To Be Troubled With Health Madness

Articles are already appearing in daily papers on how to conquer "autumn depression." They follow quickly on tips for overcoming summer sickness. Very soon we shall be told the best way of relieving winter gloom, and after that we shall look eagerly for a specific against spring depression. Every season has its disability. We are rapidly becoming health mad. The great majority seem to be unable to make up their minds what to eat, drink, wear, or do without assistance.

For Road Surfacing

Big Development Seen For Next Year In Connection With Alberta Bituminous Sands

S. C. Ellis, of the Federal Department of Natural Resources, back from his summer's work in the north, expressed his belief that there will be large developments next year in connection with the McMurray bituminous sands. He is convinced from what he has seen of low cost surfaced roads in the United States that there is a bright future for the McMurray sands for road surfacing purposes.

The population of the Roman Empire at the time of Christ has been estimated to be 70,000,000.

The chain store idea has been introduced in Egypt.

Used by Doctors

Many doctors recommend Minard's as the best Liniment made. They use it for many ills.

Must Be Over Thirty

New Ruling Bars Younger Women From Canadian Senate

The Ottawa Evening Citizen says: "The flapper vote is a very material factor now in Canada elections and much the larger portion of enfranchised women come from this class, but they are debarred from the Senate despite the decision of the Privy Council as to women's eligibility for senatorial office.

"Among the qualifications for the Upper House, it is found, is one prescribing that anyone appointed must be of the 'full age of thirty years.' This cuts out the really young woman. There is no such prohibition in the House where one of twenty-one can be seated, providing she can get elected."

Grain In Storage

Shrinkage In Volume Reported Commencing October 22nd.

Grain storage in Prairie bins shrunk in volume on October 22nd for the first time during the month. Up to that time there had been a continued rise. The total storage in the Prairie elevators amounted at that date to 56,791,000 bushels, compared with a capacity of 178,000,000 bushels.

Washable Shoes

Cotton Footwear Said To Be More Comfortable Than Leather

It won't be long now until the ladies will take their shoes off, give them a few scrapes on the washboard, and hang them out to dry.

Washable cotton shoes were among the most interesting exhibits at the fashion show of the National Association of Cotton Manufacturers, held in Boston, Mass.

The shoes in addition to being washable, will be much lighter and more comfortable than leather, exhibitors said. They are made of sudanette and sudanette faille—new cotton fabrics—and will have heels built on this leather soles. The uppers, in pastel shades, will be bordered with a fringe of beaver embroidery.

Precision In Levelling

Only Slight Error Made In Running Line Of Levels 3,647 Miles

In a line of precise levels run across the continent from mean sea level on the Atlantic to mean sea level on the Pacific, the engineers of the Geodetic Survey of Canada obtained an apparent difference of elevation of only about six inches. On the assumption that the mean sea levels of the two oceans are about the same, this indicates that only the above slight error was made in running a line of levels 3,647 miles in length.

An Oil That Is Prized Everywhere.

Dr. Thomas' Electric Oil was put upon the market without any flourish over fifty years ago. It was put out to meet the wants of a small section, but as soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

Husband: "You accuse me of reckless extravagance. When did I ever make a useless purchase?"

Wife: "What about that fire extinguisher you bought a year ago. We've never used it once."

NOTED YACHTSMAN

Sir Thomas Lipton, noted yachtsman, who is again on this side of the ocean. He was in Toronto on Oct. 21. He will attempt to regain the American Cup with the Shamrock V.

Crossed River On Skis

Vienna Men Claim Speed Of Twelve Miles An Hour

A most amusing spectacle recently greeted the spectators on the London Embankment, when, without any warning, they suddenly came across two men, clad in bathing suits, attempting to cross the Thames by means of water skis. It did not take many minutes for a wondering crowd to collect, and then, urged on by cheers and laughter, the two men, Student Franz Hirsch and Professor Michael Mitter, both from Vienna, set off on their journey across the river and back.

The skis were made of basket-work frames, and covered with waterproof. The wearer carries a small paddle with which he propels himself along. Apparently they answer their purpose well, and the two wearers claimed that they had achieved up to twelve miles per hour on the river Danube.

Tests For Air Pilots

Prospective Flier Has To Pass Rigid Examination Half-Yearly In States

Can you stand on one foot fifteen seconds, with your eyes closed and the other leg bent backward at the knee, and not fall? If so, and if your ears are healthy and your gait shows no disturbance, you have passed the equilibrium test given airplane pilots. The old whirling chair test has been discarded.

But that doesn't mean the prospective pilot's physical examination is ended. More than 700 physicians under the United States, under the direction of Dr. H. L. Bauer, of the Department of Commerce, are seeking to protect passengers against accident due to any physical defect on the part of the pilot.

First come the eyes, defects of which cause 75 per cent. of the reactions for unfitness. The pilot's eyes must have "depth perception," for a flier constantly must judge distance in taking off and landing. Eye muscle co-ordination is necessary. "Lack of co-ordination and the ability to maintain single vision," says Dr. Bauer, "is likely to cause fatigue. Fatigue causes headaches. Headaches cause inattention. Inattention causes carelessness."

Color vision is important, too, because the pilot must be able to recognize navigation lights and other signals. Shades of brown and green, and the ground indicate the character of the terrain to aid in landing. A wide field of vision is essential because a pilot must be able to see objects out of the corner of his eye while looking straight ahead. Then general physical examination is thorough and the nervous system drawing special attention. After a pilot is once examined and passed, he is required to take physical examinations semi-annually.

Recipes For This Week

(By Betty Barclay)

RICE CUSTARD SUPREME

1 1/2 lb. shredded coconut.
2 eggs.
2 cups of milk.
1/4 teaspoon salt.
1/4 cup sugar.
1 1/2 cups cooked rice.
1/2 teaspoon vanilla.

Beat the eggs thoroughly, yolks and whites together. Add the milk, salt and sugar, stir in the rice, coconut and vanilla, and turn into a baking dish. Place in a pan of hot water and bake twenty to thirty minutes in a moderate oven—about 350 degrees Fahrenheit.

TWO EMERGENCY SALADS

Cabbage Fruit

Peel oranges, removing all white skin. Cut into one-fourth inch slices and then into segments. Cover salad plates with finely-shredded cabbage. Sprinkle with orange segments. Serve with French dressing.

Cheese Ball Salad

Peel oranges and divide into segments, rejecting a white inner skin. Arrange on salad plates covered with lettuce. Garnish with balls of cream cheese rolled in grated orange rind.

There is no poisonous ingredient in Holloway's Corn Remover, and it can be used without danger or injury.

Unnecessary Questions

Policemen of London are secretly complaining that they must be too versatile. In a recent police examination they were asked, among other things, how they would repair a stained floor in a house, make a three-legged dog or arrange a film show for children between 10 and 15.

Zoo records indicate that animals tend to live longer if they are well cared for in captivity than those that live in a wild state.

China and Japan are said to have 200,000 square miles of coal fields.

The curvature of the earth is about eight inches per mile.

Almost every part of the whale has a commercial value.

Use Minard's Liniment in the Stables.

Change In Fashions

Use Of Hooks and Eyes Will Revive Old Industry

How a slight change in fashions may affect whole industries is aptly illustrated in the recent decision of dress designers that "slip-on" frocks are to be replaced with the "old-fashioned" bodice moulded close to the figure. This means, according to an item in London papers of recent issue, that hooks and eyes must be used. And with the return of hooks and eyes a score of more firms are dusting off old machinery and getting ready to fill up almost forgotten pay rolls.

Before the war women in Great Britain alone used 2,880,000,000 hooks and eyes every year. Two-thirds of them were made in that country by some thirty-five firms who manufactured little else. The hook and eye survived the war but the jumper fashion in 1920 killed it. Thousands of workers were dismissed. One Birmingham manufacturer is quoted as exclaiming joyously: "We have had machinery put away for years in the hope that something like this would happen."

And, oh, yes, there is just one little difference between the pre-war hook and eye dress and that of today. The hooks and eyes are now within reach of the wearer. It will not be necessary for husbands to stand by to do the hooking.—Edmonton Journal.

For Detecting Icebergs

Method Perfected By Dr. Barnes Of McGill University

A method of detecting in fog or at night the proximity of icebergs at sea by recording their explosions as they disintegrate has been perfected by Dr. Howard T. Barnes, of McGill University, who has returned from a voyage of experiment off Newfoundland.

Attempts were made with a marine microphone to pick up the sounds of the explosions of the icebergs as they broke in the warmer water, but nothing was heard.

Then an improvised microphone, consisting of a rubber hose with a funnel attached to one end and a sheet rubber placed over it to make it waterproof, was used. It was ascertained that the explosions could be recorded up to a distance of six miles.

Cultivate National Spirit

John Imrie Tells Easterners About Our Greatest Problem

"While we have many economic problems in Canada, our greatest problem is not economic but spiritual. It requires maintenance of a national outlook and a national spirit in the face of a geography that is a constant invitation to sectionalism," said John Imrie, managing director of the Edmonton Journal, in an address at Halifax recently.

Mr. Imrie spoke on "Carving out a new Northwest," and declared the present movements to the north and west of Canada were much broader than previous immigration and settlement waves.

Referring to unemployment recommendations of the Duncan report, he said: "The rest of Canada owes it to the Maritimes to see that these recommendations are made effective."

A Unique Cricket Match

A cricket match between sides of 400 each—played in Samoa for a stake of 100 keps of beer—lasted for three months and ended in a free fight. The teams represented two native villages, which at the end of the three months were in a state of starvation because the men had neglected their families in favor of the game! Thus the free fight, in which several lives were lost.

B.C. Coal Production

The production of coal in the province of British Columbia for the first nine months of the year which ended with September 30, shows a total output of 1,995,340 tons. Of this total, Vancouver Island collieries produced 850,364 tons.

Just to add to our already large stock of useless information we would like to know why a cow that gives milk is called a "milch" cow.

More than 45,000 thunderstorms each day is the record for the entire earth.

The height of the rays of the Aurora Borealis varies from 50 to 200 miles.

The first patent of the telephone was granted in 1876.

Minard's Liniment relieves stiffness.

Every person uses on an average of 12 pounds of soap annually.

Breaks Up Gas In the Stomach

Don't suffer from dangerous gas pressing down your heart, from sourness, acidity, bloating or pain of indigestion. Stop worry and distress. You need quick stomach relief take a little Bismuth. Bismuth is a powerful stomachic. It breaks up gas, neutralizes acids and keeps the stomach sweet and strong. Indigestion perfect. At all good drug stores.

Spectacles For Color Blind

Special Glass Absorbs Rays Troublesome To Such Persons

Spectacles through which a color-blind person can distinguish colors like people with normal eyes, are finally promised, at least for some varieties of color-blindness, by new glass materials perfected by Professor Franz Weidert, of the Technical College in Berlin. The materials resemble ordinary glass but contain the rare chemical elements neodymium and praseodymium. In thin sheets of lenses like those used in spectacles, the new glasses seem almost perfectly transparent. Examination with a spectroscopic discloses, however, that certain rays of the complete rainbow-colored strip into which white light is separated by that instrument are missing after the rays have passed through the new glass. The glasses absorb these rays, the particular ray which is absorbed differing for different chemical compositions of the new glass.

The rays chiefly absorbed happen to be orange and yellow ones, the German physicist reports, standing in the spectrum between the red and the green, which are two of the colors most troublesome to color-blind individuals. The removal of these intermediate rays by the new glasses, it is found, to increase the apparent contrast between red and green so that spectacles of the new glasses are expected to make the distinction of those two colors easier for people who are color-blind.

Exact Distance Important

Astronomers Must Know How Far Away Sun Is

The distance of the sun is to be measured through work at the University of Cincinnati in co-operation with the Royal Observatory of Berlin. The latest computation, accepted by astronomers fixes the mileage at 92,900,000, believed to be within 50,000 miles of the exact distance.

Why bother about fifty thousand miles?

"Because," answers Dr. J. M. Porter, director of the Cincinnati Observatory, "most important of all the problems presented by astronomy is that of finding how far away the sun is. For this distance is our measuring rod by which we determine the exact extent, not only of the solar system, but of the vast outlying universe as well."

Astronomers use a planet as a stepping stone to help them reach out with more accurate computations toward the sun's exact position. They get a measurement of the distance to a nearby planet, and use that as an aid. In the present measurement, Eros, the latest planet discovered, found only a few years ago, and but 14,600,000 miles away from the earth is the stepping stone. At the beginning of 1931 it will be in an extremely favorable position for the solar work. Meanwhile, several years of preparation are necessary.

Must Be a Reason

"Hey, Ma," said Willie, pointing to the orchestra leader at the famed soprano's recital, "why does that man keep hitting that woman huh, Ma?"

"Sh-sh! He's not hitting her; he's still."

"Well, then, what's she hollerin' for?"

HELPED DURING MIDDLE AGE

Woman Praises Lydia E. Pinkham's Vegetable Compound

Sarnia, Ont.—"I am willing to answer letters from other women, to tell them the wonderful good Lydia E. Pinkham's Vegetable Compound did for me. I cannot be thankful enough for the benefits I received from the Change of Life. I do housework and my troubles made me unfit to work. A friend advised me to try the Vegetable Compound. I felt great relief at once, began to regain my appetite, and my nerves got better. I will recommend your medicine to all with troubles like I had."—Mrs. John Benson, 162 N. Christina St., Sarnia, Ontario.

The Singing Fool

By HUBERT DAIL

Copyright, 1934, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, is loved by Grace Farrell, the cigarette girl, but he does not know that. He marries Molly Winton, a ballad singer, and wins fame as a composer of popular songs. When their baby, Junior, is about two years old, Molly elopes with John Perry, Al's best friend, taking the child. Molly consents to a last farewell between Al and Junior before she sails for France. After this takes place at a park entrance Al walks towards the center of the city, completely broken by his tragic loss. He plans to leave the Broadway night life and disappear. The lights of evening flick the sky.

CHAPTER XXI

But, in order to live, Al knew he must create a new life for himself. The old life was closed. He felt himself entirely alien to night clubs and the whole Broadway life; if he wrote a song it would be so tragic and filled with pain that no song-publisher or revue producer would want it. No, there was nothing for him to do but disappear from the old haunts.

In a few days, when he had pulled himself together, he would see Cline and collect on his share of the ownership of the Club Bomba. Then—goodbye!

He had reached the end of the park, at 96th Street. How the city roared; the night life was beginning, the life of which he had been a living part only a short time ago. He glanced at his watch—almost six o'clock. They were ordering all the visitors ashore from the Ile de France; in a few moments the gangplank would be lifted and the big floating hotel of a liner would pull slowly from the dock.

Days passed; and Broadway saw no more of Al Stone. Where had he gone? His friends asked Billy Cline, his former business partner, but Billy could only shake his head sadly and say he didn't know. Marcus wanted Al to write some new numbers for a revue he had in rehearsal, but there was no Al to be found.

clothes were old and nondescript, his face was thinner and the cheerful kindly glow in his eyes had vanished.

Nevertheless the man who stared at her in sudden recognition for a moment was Al—she was sure of it. She walked back to the corner and followed the direction he had taken. But either Al moved faster than she or he had darted up an alley, for she saw no sign of him. Thoughtfully she retraced her steps, her mood and expression sobered by the tragic implications of the sight she had just witnessed. So that was Al, broody, wisecracking, generous Al—the man who had been the hero of her girlhood three years ago, the man she had loved so devotedly! That was the youthful singing waiter whose rapid rise to fame had been one of the romances of Broadway and whose disappearance into obscurity had been one of the mysteries of the Street of Lights.

Grace had followed Al's career with the keenest attention from the fateful time when he left Blackie's night club until recently. She knew every story of his triumphs, every version of his disastrous marriage, as they were gossiped about in cabaret circles, uptown and down, and as they appeared in newspapers and theatrical weeklies. For a year after Al left Blackie's her love for him had remained, first a throbbing recollection within her, then a faint murmur from the past.

But after he ceased to visit Blackie's and became so definitely a figure belonging to Broadway, this spirit of love became like the hot note of an echo—it seemed to pass away lightly. Before that he had been a part of her life, afterward he was just a graceful and vague figure who had once stirred her as no man had been able to do since that time.

Grace had stayed on at Blackie Joe's. She had no scintillating talent to carry her to the peaks of Broadway success; she could not sing and dance professionally. She possessed a lovely and delicate beauty, unswerving loyalty, keen intuition, plain common-sense and a frank, unspooled nature. These qualities, while they may be among the most important in life, may not win fame for the persons who possess them.

Grace was obscure, but still she had scored her little successes. After Al was swallowed up by Broadway, Blackie Joe, himself, had kept a kindly eye on her and saw she was protected from the riff-raff among his customers. Soon he had promoted her from the job of cigarette girl and raised her salary. Now she was his assistant manager; she kept track of his accounts and checked the waiters when they carried food and drink to the customers.

Blackie had felt terribly sorry for Grace after Al's disappearance. Molly—she was the only living person, with the exception of Grace herself, who had any conception of the deep love the former cigarette girl had for Al. Blackie often asked himself—Why on earth wasn't Al able to see that? When Blackie read of Molly's desertion he nodded sadly.

Now, as Grace pursued her way, a flood of memories swept across her mind—Al as he used to look in his waiter clothes, Al as he had sung his first love ballad—"Always"—to Molly on the floor of Blackie's club, Al as she had once seen him at an uptown night club, resplendent in fine clothes. Al as she had seen his picture in the papers with Molly and his baby Junior.

Grace still recalled how the news of Junior's arrival had sent a stabbing throb through her heart that she did not understand. Then came an intense longing to see the baby that Al fathered. But that too was a faint memory—now.

It was afternoon and Grace was not due at Blackie's until evening. However, she wanted to tell the night club owner her news, so she changed her course and mounted the familiar, shabby steps. The main room was dark and deserted, but Blackie was in his office. He glanced up as Grace entered.

(To Be Continued.)

Centres Of Lumbering

The Ottawa Valley became the most important centre of commercial activity in the lumber industry of Canada with the beginning of the trade in rafting its square timber to Quebec for export. The Georgian Bay and Rainy River districts were later opened up and although the industry is now established over the entire Dominion, these districts are still among the chief lumbering regions in Eastern Canada.

Australia, New Zealand and Argentina are the greatest wood-producing centres.

Too many characters are left around house.

Wins Asquith Cup

Miss Pearl Miller, a New Canadian Is Awarded Coveted Trophy

Miss Pearl Miller, 19, a new Canadian, is this year's winner of the silver challenge cup presented to the pupils of Asquith school by the late Earl of Oxford and Asquith. The trophy is awarded annually to the most proficient pupil.

Miss Miller, now attending Saskatchewan Normal School, came to Canada from Russia in 1924, and was then unable to speak English. From August, 1925, to June, 1926, she attended public school in Saskatoon, and covered the work of grades 1 to 8 inclusive. In 1926 she moved to Asquith, and took her high school work in the next three years.

Many Mothers Always Keep Them In The House

Thousands of mothers state that they know of no other medicine for little ones to equal Baby's Own Tablets—that they always keep the Tablets in the home as a preventive of childhood ailments, or if sickness does suddenly grip their little ones they feel safe with such a remedy at hand.

Concerning the use of the Tablets Mrs. Donat Plouffe, Tignewick, Que., writes: "I have nothing but praise for Baby's Own Tablets. They are the only medicine I have ever given my two little ones and I am glad to state that the Tablets have always kept them in perfect health. I feel so safe with the Tablets that I always keep a box in the house."

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels, sweeten the stomach, and thus banish constipation and indigestion; break up colds and simple fever and make the cutting of teeth painless. The Tablets are absolutely safe, being guaranteed free from all injurious drugs. They are sold by all medicine dealers or by mail at 25c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

True Friendship Is Rare

But Few People Make Any Effort To Retain It

We should never let a friend go out of our lives, if we can by any possibility help it. If misunderstanding arises, let them be quickly set right. Friendship is a too rare and sacred treasure to be thrown away lightly. And yet many people are not careful to retain friends. Some lose them through inattention, failing to maintain those little amenities, courtesies, kindnesses which cost so little and yet are books of steel to grapple and hold our friends.

Death by boiling was a favorite method of execution in the time of Henry VIII.

Stop falling hair with Minard's Liniment.

There are about 9,000 cells in a square foot of honeycomb.

The man who does right because it is right is all right.

John Bull a Poor Advertiser

Discovered That Great German Flying Boat Fitted With Engines Of British Design

When the great-German flying boat sailed over Lake Constance the other day with the record human load of 169 persons, the world of aviation properly hailed it for what it appeared to be—a new triumph in the air for Germany. But all the story was not told at once. Germany may not claim all the triumph. The great craft is fitted with twelve engines, 523 horsepower each, of the British Jupiter design, made in German workshops under British license.

Little if anything appears to have been said about these engines until an aviation critic in Great Britain came out with the warning that the fight in question "throws Britain further behind in civil aviation and makes Germany the leader of commercial flight throughout Europe." Then the truth was told. As one Canadian correspondent in London says: "The curious British mentality which finds Britain backward in thousands of ways and foreign countries much more go-ahead has received a rude shock from the discovery about these engines." Once again John Bull has shown himself to be a poor advertiser.—Victoria Daily Times.

Send Mail By Rockets

Claimed That In Short Time Mail Will Be Carried By Rocket From Berlin To New York

It is confidently asserted by the German Professor Oberth, that in a short time mail will be sent by rocket from Berlin to New York by a single propulsion. This means that letters thus sent will arrive in New York about a half hour later. The matter is taken so seriously that the American ambassador to Germany was prompted to say: "I must call attention to the fact that our government will insist that life and property be not endangered by the rockets landing. I cannot say what guarantees would be required, but if Professor Oberth asks permission to shoot a rocket to America the state department must be informed." As the American ambassador, Mr. Schuman, is a man of broad intelligence, it may be assumed that his acceptance of the possibility of such a feat is not ridiculous.

Rockets are, seemingly, the newest toys and instruments of a scientific age which prefers to leave nothing to the imagination. Rocketeers will soon be joining racketeers to disturb our peace and to turn the incredible into the commonplace.

Asthma Brings Misery, but Dr. J. D. Kellogg's Asthma Remedy will replace the misery with welcome relief. Inhaled as smoke or vapor it reaches the very innermost recesses of the bronchial passages and soothes them. Restriction passes and easy breathing returns. If you knew as well how this remedy would help you as do thousands of grateful users, there would be a package in your home tonight. Try it.

Scots Production Record

This is an age of records—and the apricot tree in the lot of R. L. Charles wishes to keep up with the spirit of the times. So it set out this spring with a record in mind: The single tree, according to Charles, bore 200 pounds of the fruit, of which the average size was two inches in diameter.

The Scotch are such good golfers because they realize the fewer times they hit the ball the longer it will last.

Your Child's Cold Needs This Double Treatment

CHILDREN hate to be "dosed." When rubbed on, Vicks relieves colds 2 ways at once without "dosing": (1) Its healing vapors, released by the body heat, are inhaled direct to the air passages; (2) "It draws out" the soreness like an old-fashioned poultice.

Little Helps For This Week

"Thou wilt keep him in perfect peace, whose mind is stayed on Thee; because he trusteth in Thee."—Isaiah xxvi. 3.

Oh, this is blessing, this is rest! Into Thine arms, O Lord I flee; I hide me in Thy faithful breast. And pour out all my soul to Thee. O tenderness! O truth divine! Lord, I am altogether Thine. I have bowed down—I need not flee, Peace, peace is mine in trusting Thee!—Anna Laetitia Waring.

Place your whole trust in the Lord; let Him alone be your fear and your love. He Himself will answer for you, and will do what is best for you. Here you have "No continuing city," and wherever you are you are a stranger and a pilgrim; nor will you ever find rest until you are inwardly united to Christ.—Thomas A. Kempis.

Determined To Come To Canada

The Scottish edition of the London Express says: "A young Scotswoman, who booked her passage to Canada at Wood Green, paid her fare of £19 10s. in half-crowns, having saved one half-crown a week for three years."

Persian Balm creates and preserves lovely and youthful complexions. Tones and stimulates the skin. Fragrant as a flower. Cool as morning dew. Swiftly absorbed by the tissues, making the skin wonderfully soft-textured. Unrivalled as an aid to feminine elegance. Delightful to use. Imparts additional charm to the daintiest of women. Persian Balm is the one toilet requisite for the exacting woman. Fearless as a beautifier.

Critic: "The picture of the horse is good, but where's the wagon?" Artist: "Oh, the horse will draw that."

A Chinese professor claims to have found a man, Li Yung, who is 252 years old. What a Li professor!

Planes arriving at or departing from the Chicago district have 29 landing fields from which to choose.

CONSTIPATION RELIEVED QUICKLY

This Purge Vegetable Pill will move the bowels without any pain and depressing after effects. Sick Headaches, Indigestion, Bilelessness and Bad Complexion quickly relieved. Children and Adults can easily swallow Dr. Carter's tiny, sugar coated pills. They are free from calomel and poisonous drugs. All Druggists 25c and 75c red pkgs. **CARTER'S LIVER PILLS**

Needless Pain!

The man who wouldn't drive his motorcar half a mile when it's out of order, will not drive his brain all day with a head that's throbbing.

Such punishment isn't very good for one's nerves! It's unwise, and it's unnecessary. For a tablet or two of Aspirin will relieve a headache every time. So, remember this accepted antidote for pain, and spare yourself a lot of needless suffering. Read the proven directions and you'll discover many valuable uses for these tablets. For headaches; to check colds. To ease a sore throat and reduce the infection. For relieving neuralgia, neuritis, rheumatic pain.

People used to wonder if Aspirin might be harmful. The doctors answered that question years ago.

Main Street

All elevators in Irma will be closed on Monday December 2nd at noon.
Born to Mr. and Mrs. J. Jackson, Tuesday, November 19th, a son.
Mr. R. C. Johnson, intends leaving Sunday to visit friends in Toronto.

Mrs. Lindquist had her tonsils removed in the Hardisty hospital Monday.

The Poultry Pool will have another poultry car at Irma, Wednesday, the 27th.

Mr. and Mrs. J. Fletcher and Jack Junior, returned Wednesday after spending a few days in the City.

Mrs. H. Boucek, of Heath, has been visiting with her parents Mr. and Mrs. F. Peterson.

Irma Ladies Aid will meet at the home of Mrs. Elford next Thursday afternoon. All ladies are invited to attend.

A Bridge and Whist Drive will be held in the Masonic Hall on Monday, December 9th under the auspices of the Order of Eastern Star. Admission 50c. Everybody welcome.

Mrs. Wm. Bacon underwent an operation for appendicitis in the Hardisty hospital Tuesday. We understand that she will be able to return home in a few days.

Mr. and Mrs. Ralph Dunlop and their son Orville Fenton, left by motor car for their home at Indian Head Manitoba, after spending the summer in Alberta.

The Irma Rebekah Lodge No. 87 are having a Whist Drive in the Lodge room on Tuesday night, November 26th. Admission 25c. Everybody welcome.

Murry McKillop, who has been spending the summer on the Chase farm on Strawberry Plains intends leaving Sunday for his home in Michigan.

Mr. R. D. Smallwood and Mr. Vesey members of the Council of the Municipality of Battle River, are attending the Municipal convention at Edmonton this week.

Mr. Jas. Clark, who was reported seriously ill in last week's issue is doing nicely but will be confined to the Hardisty hospital for some days yet.

Wednesday and Thursday the Irma district has had a sample of real winter weather, the thermometer dropping several degrees below zero, but so far we have had practically no snow and the roads are in excellent condition for motoring.

The Irma Public School have completed fencing the school grounds and the Board of Trustees wish to point out to the ratepayers of this school district that the school will not be responsible for children outside of the school grounds during school hours.

Eighteen members of the Killam Lodge I. O. O. F. visited Irma Lodge Tuesday evening and exemplified the first degree. After lodge refreshments were served by the local members and a very pleasant evening was spent.

While going home early last Friday evening, Mr. C. T. Hill had the misfortune to run into a cow belonging to Mr. L. Gulliver about a quarter of a mile east of Irma, in which the cow appears to have come out second best. The radiator, lamps, hood and practically all the front of the car was badly bent, but no one in the car suffered any injury.

Several cars of stock have been shipped from Irma this week. Apparently only the surplus stock is being shipped and quite a few cattle are being held over. Lots of farmers who had gone out of cattle a few years ago when they thought they would always be assured of a good wheat crop are wishing now that they had a few head of stock to tide them over a season such as we have just had.

By request a sample of water taken from the well of the Irma Public School was sent to the Provincial Laboratory for analysis. They report as follows: "The water represented by this sample does not show any bacteriological evidence of unfavorable contamination. Chemically it is somewhat high in vegetable organic matter. It is hard water, particularly high in saline content and can be used for the purpose proposed." A more detailed report of this water sample can be seen at the office of the Secretary Treasurer of the Irma School District.

CHANCE IN TRAIN TIME

Commencing November 17th a new time card will be in effect on the C. N. R. main line. No. 1 fast train going west will pass through Irma at about 7:30 P.M.; The local passenger No. 77 going west will leave Irma about 3:50 P.M. instead of 4:45 P.M.; No. 2 going east will pass Irma at about 11:08 A.M. and No. 78 the local passenger from Edmonton will arrive at about 12:40 noon.

The Wastebasket

The authorities in a neighboring town were all stirred up recently when they found a strip of paper on the street with the word "Kill" written in large letters at the top and followed by the names of a number of well known citizens. With visions of gangsters who proposed to exterminate these citizens the village marshal notified the sheriff and several deputies were placed on guard around the town. The editor of the local paper heard of it in his search for news and when he was shown the mysterious paper he burst out laughing. It was just a correction sheet of his mailing list in which he had marked a bunch of dead heads to be cut off from the subscription list because they had failed to pay up, and marked in the usual custom of the printing office the word "Kill." It had blown out of the window of the office on to the street and caused all the commotion. The moral is to pay up your subscription and avoid the possibility of stirring up your home town in this manner.

"Say, mister," said a city boy visiting a farm near here last week, "do you have to buy chewing gum for all them cows?"

"I told my new girl she was the eight wonder of the world," said one fellow to another on the street here Monday. "What did she say to that?" asked the other. "Oh, she said to let her catch me playing around any of the other seven," was the reply.

Heard at the ladies social: "Have they been married long?" "Just long enough to find out that there are a lot of things that you can't say with flowers."

"Dearest, I thought I would get your birthday present today," said a local lady to her husband last week. "So I've got you a new rug to put in front of my dressing table, and a statuette for the mantel piece."

"Yes," he replied, "and I've brought the presents for your birthday; a new razor and some ties."

Scientists now claim that insects have developed a kind of language among themselves. You can imagine a couple of flies discoursing as follows: First fly: "These mortals are a confounded nuisance." Second fly: "That's so. I no more than sit down for a moment quietly than one of them takes a slap at me."

"What did papa say when you asked to marry me?" inquired a Kinsella girl of her fiancé. "Oh, he was pretty mad about it and made a big fuss at first," the young fellow replied, "but I gave him one of those famous Coffin Nail cigarettes and after smoking it he felt all right about it."

NOTICE

Notice is hereby given that the Pound situated on N.W. 17-47-5-4 is now closed. R. Moulton being no longer poundkeeper. W. Prior being appointed poundkeeper, the pound will be situated on the S.W. 22-47-8-4 until further notice.

By order of the Council.
ARTHUR CURTIS, Sec.-Treas.
M. D. Boulton Coulee No. 453.

NOTICE

TO HUNTERS & TRAPPERS. Parties destroying fences or trapping on the following lands will be prosecuted. Section 6-46-9-w4th, also S.E. 5-46-9-w4th, and the South half of 8-46-9-w4th—L. Hager and L. J. Gwinn, Irma. 6-8P.

NOTICE TO HUNTERS

Parties hunting on, or damaging fences on the following lands will be prosecuted: N.E. 19-44-9-w4th; S.E. 30-44-9-w4th; W. Half 20-44-9-w4th; N.E. 20-44-9-w4th; W. Half 21-44-9-w4th. — Jas. A. Bell, Owner. 4-8P.

Now is the time of the year to advertise for those stray horses and cattle. A small ad in this paper will help you.
